

TKU Toilet Policy

This policy is designed to minimize the risk to any children under TKU care when needing to use the toilets during training sessions.

Risk could come from unknown or known adults and other children known or unknown.

All parents should be advised and regularly reminded to ensure children particularly younger children have used a toilet prior to training.

It is recommended that prior to commencement of training all children are reminded to use toilets as no allowance will be made once training commences until the end of a specific session (Unless medical conditions exist).

If a large number need to go to the toilet at once they should be sent in small groups and counted for tally upon their return from where the next group can go.

Going to the toilet during training sessions should be discouraged at all times. If a child's parent is present then they can (if the child is young) take their child to the toilet.

For the purpose of defining a young child the age will be under 9.
